

# *Have you considered...*

...how your company might be able to utilise innovation to drive your business forward during these challenging times? With so much uncertainty, ensuring that your intellectual property (IP) is sufficient in order to protect your business now and that you have in place adequate planning for the future, both in the UK and globally, is even more important.

Now, more than ever, we understand the concerns that businesses have in relation to the cost of checking the value of their IP, so we are offering a free service which includes:

- **personal discovery consultation (50 mins);**
- **mini IP audit; and**
- **written, tailored report providing advice and recommendations.**

Don't underestimate the value of your IP, and think of how any potential 'down time' in the coming weeks could be used wisely in order to plan for your business' future.
